Atherapy Wellness

Intravenous Vitamin Therapy,
Energise Your Life

Atherapy Wellness offer a variety of different Vitamin IV drips tailored to your individual nutrient needs. Vitamin IV drips are an intravenous cocktail of nutrients delivering essential minerals that are lost through day to day activity. Each vitamin, mineral, and electrolyte is delivered straight in to your bloodstream leaving you feeling instantly rejuvenated and revitalised.

As part of Atherapy Physiotherapy, we offer speciality IV drips created by our trained staff of medical professionals, that compliment your training and rehabilitation needs – whether you simply need an energy boost, immune system recovery, or instant rehydration, we provide all of our clients with a unique and relaxing experience.

Why not just supplement orally?

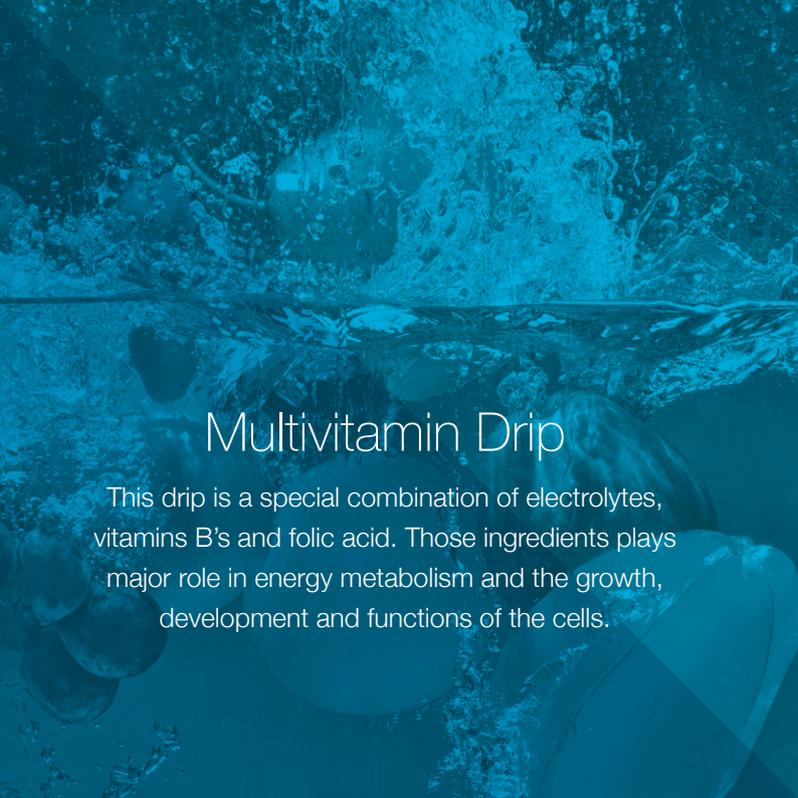

Vitamins that are administered via IV drip are immediately absorbed in to the bloodstream, meaning that they get to work much quicker than your average sports supplement. The digestive system is bypassed meaning that 100% of the vitamins and minerals that you need are being put to work straight away due to blood concentration which cannot be achieved via conventional methods of supplementation (liquids or pills). IV drips are a safe and effective way to deliver nutrients directly to the cells of the body when they need it most, as well as greatly reducing the amount of treatment time needed to cure acute and chronic illness.

Hydrate me

Combination of electrolytes and vitamin B12 will help with recovery after intensive work out, rehydrate the whole body, remove lactic acid and boost the energy levels.

Antioxidant

Combination of the most powerful antioxidants such as glutathione, vitamin C, Coenzyme Q10 and multivitamins. Perfect to slow down ageing process, increase collagen production and boost energy levels.

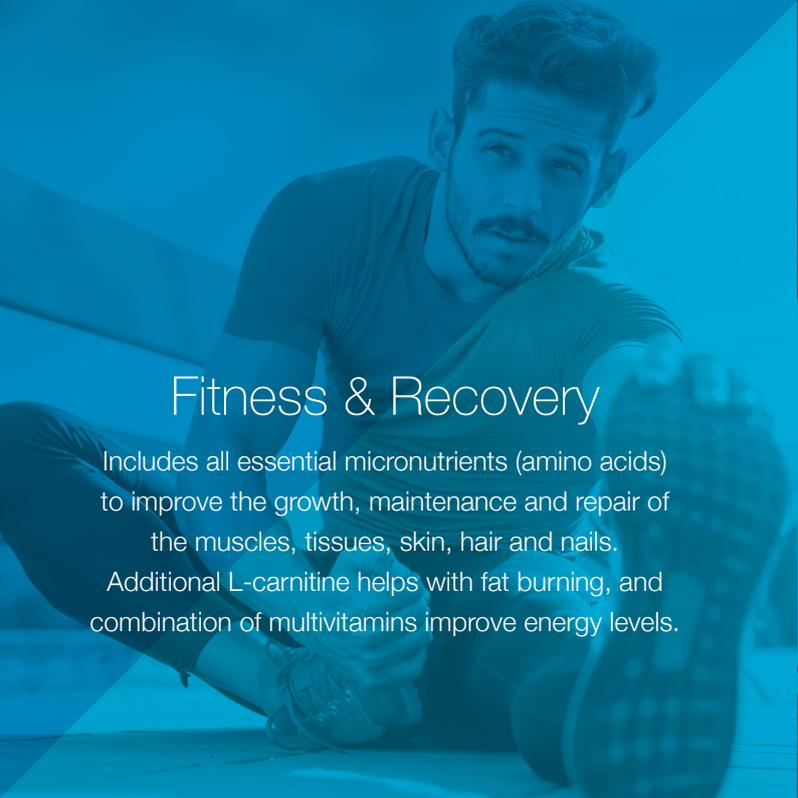

Multivitamin Drip

This drip is a special combination of electrolytes, vitamins B's and folic acid. Those ingredients play a major role in energy metabolism and the growth, development and functions of the cells.

Immune Booster

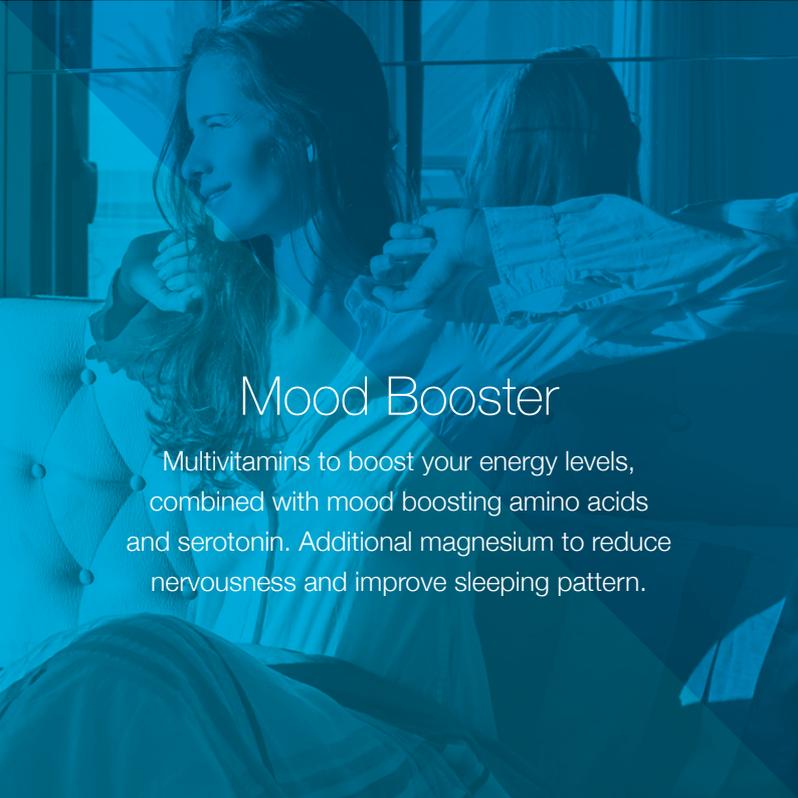

High dose of vitamin C in combination with master antioxidant glutathione will help to fight infection and detoxify your body. In addition, combination of multivitamins will increase your energy levels.

Fitness & Recovery

Includes all essential micronutrients (amino acids) to improve the growth, maintenance and repair of the muscles, tissues, skin, hair and nails.

Additional L-carnitine helps with fat burning, and combination of multivitamins improve energy levels.

Mood Booster

Multivitamins to boost your energy levels, combined with mood boosting amino acids and serotonin. Additional magnesium to reduce nervousness and improve sleeping pattern.
